### **Summary**

This report covers the Business and Performance of The United Kingdom Freight Demurrage and Defence Association Limited ("UKFDD" (solo)). Collectively, the consolidated position is referred to as "the Group". It also covers the System of Governance, Risk Profile, Valuation for Solvency Purposes and Capital Management under the requirements of the Solvency 2 regime.

The ultimate Administrative Body that has the responsibility for all of these matters is the Group's Board of Directors, with the help of various governance and control functions that it has put in place to monitor and manage the business.

The financial year runs to 20 February each year and it reports its results in Pounds Sterling.

For solvency purposes the Group uses the standard formula to calculate its Solvency Capital Requirement ("SCR") and as a mutual insurer of the marine legal expense risks of its Members, the Group's insurance business is classified as legal expenses insurance for Solvency 2 purposes. All business is underwritten from the United Kingdom and Cyprus, however Members are dispersed internationally.

During the year under review the Group has shown a loss for the year of £0.28 million (2022: profit of £0.08 million) as reported in its annual financial statements under UK GAAP. The loss for the year was mainly the result of increased increased claims in combination for foreign currency losses. The loss for the year resulted in a free reserve of £4.53 million (2022: £4.81 million) which is reduced by £1.18 million (2022: £0.42 million) as a result of unmatured forward currency contracts that are included in the Group's hedging reserve and forms part of the Group's capital reserves.

This is the eighth year that the Group has returned premium to its Membership by way of a continuity credit scheme.

During the year under review the Group has seen an increase in premium levels driven by a weakening in Sterling relative to US Dollars. To manage this risk the Group hedges its US Dollar premium income through the use of forward currency.

For solvency purposes the Group's total own funds stood at £11.4 million (2022: £11.1 million) which are supported by and include ancillary own funds, as approved by the Group's regulator and represent the capital benefit associated with UKFDD's ability to make a contingency call on its mutual Members. This resulted in eligible own funds of £11.4 million (2022: £11.1 million) against an SCR of £4.5 million (2022: £4.4 million) resulting in 255% coverage (2022: 252%) and eligible own funds of £9.2 million (2022: £8.9 million) against an Minimum Consolidated Group Solvency Capital Requirement of £4.7 million (2022: £4.2 million) resulting in 197% coverage (2022: 211%).

# **Summary (continued)**

For SCR purposes UKFDD (solo basis) eligible own funds stood at £11.4 million (2022: 11.1 million) to cover the SCR standing at £4.7 million (2022: £4.4 million) resulting in a capital adequacy ratio of 241% (2022: 244%). In terms of UKFDD (Solo basis) MCR, eligible own funds stood at £9.0 million (2022: £8.8 million) against an MCR requirement of £2.3 million (2022: £2.2 million) resulting in coverage of the MCR of 389% (2022: 419%).

### A. Business and Performance

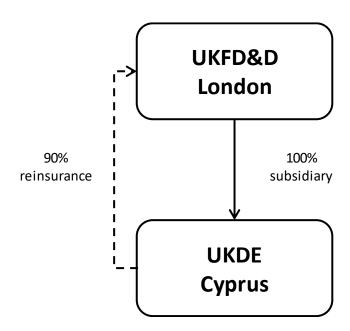

#### A.1. Business

#### Corporate information

UKFDD is incorporated in the United Kingdom as a company limited by guarantee without share capital. In the event of the company's liquidation the net assets of UKFDD are to be distributed in proportion to the amount of contributions paid by Members during the preceding six years.

#### Group structure

At the year-end date, UKFDD was the parent company of the Group. The Group writes legal cost insurance on behalf of its Members and policyholders. UKFDD owns 100% of the share capital of The United Kingdom Freight Demurrage and Defence Insurance (Europe) Limited ("UKDE") as detailed in the table below:

#### Regulation

The Group's regulators are:

- Prudential Regulation Authority ("PRA"): 20 Moorgate, London, EC2R 6DA, United Kingdom
- Financial Conduct Authority ("FCA"): 25 the North Colonnade, London, E14 5HS, United Kingdom.

UKDE is regulated by the Superintendent of Insurance in Cyprus located at Michael Karaoli & Gregori Afxentiou, 1439, Nicosia, Cyprus.

# A. Business and Performance (continued)

#### **External auditors**

The Group's external auditors are BDO LLP: 55 Baker Street, London W1U 7EU. It should however be noted that, for the 20 February 2023 year end, the Solvency II results of the Group has not been subject to external audit under the exemption granted by the PRA to smaller insurance firms.

#### Overview

The Group carries on the business of mutual insurance of its Members and policyholders against legal costs and expenses as defined in the Rules of the Association. UKDE reinsures around 90% of its business to UKFDD which in turn reinsures 90 per cent of its group business with The United Kingdom Defence Insurance Association (Isle of Man) Limited ("UKDIA"). This SFCR presents only the results of the Group, and excludes the results of UKDIA.

For Solvency 2 purposes the Group business is classified as legal expense insurance.

The number of ships entered in the Association at the year-end on 20 February 2023 was 4,035 (3,257 owned and 777 chartered), compared with 4,127 (3,259 owned and 868 chartered) on 20 February 2022. In terms of tonnage, the Association insured 224.5 million tonnes at 20 February 2023 compared to 230.7million tonnes at 20 February 2022.

### A.2. Underwriting Performance

All of the Group business is underwritten from the UK and Cyprus, although Members are internationally dispersed. The Group writes the insurance of legal expenses. Because the Group covers movable risk, geographical analysis of location of risk is not feasible. For information on underwriting performance by material geographical area refer to Quantitative Reporting Template ("QRT") S.05.02.01 which shows a geographical analysis by Member location and forms part of the Group's annual regulatory reporting requirement.

# A. Business and Performance (continued)

For the year ended 20 February 2023, the Group produced an underwriting loss of £0.03 million (2022: loss of £0.6 million) as detailed further in the table below which is a summary of the Group's technical account reported on a UK GAAP basis.

Summary of technical account as at 20 February 2023:

|                                     | 2023<br>£000s | 2022<br>£000s |
|-------------------------------------|---------------|---------------|
| Income and expenditure              |               |               |
| Net earned premium                  | 11,435        | 10,002        |
| Claims incurred, net of reinsurance | (6,044)       | (5,679)       |
| Net operating expenses              | (5,423)       | (4,965)       |
| Balance on the technical account    | (32)          | (642)         |

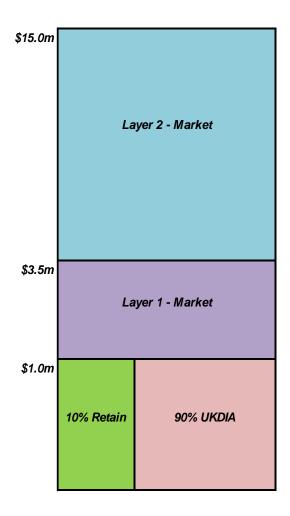

The underwriting loss stems from an increase in the Group's claims incurred and operating expenses, partly offset by an increase in earned premium.

#### **Risk mitigation**

The Group writes policies with a maximum policy limit of \$15 million. The first \$1.0 million of claims is retained by the Group after which claims of \$14.0 million excess of the \$1.0 million retention are reinsured on an excess of loss basis. Retained claims are further ceded to the Group's quota share reinsurer UKDIA on a 90% quota share basis. This arrangement is consistent with the prior year.

The below table illustrates the reinsurance programme of the Group:

# A. Business and Performance (continued)

Exposure to reinsurance counterparties within layers 1 and 2 is mitigated by the Group placing its external reinsurances with counterparties rated A- or better.

On its 90% reinsurance programme, the Group has the benefit of a legal charge in the form of a fixed charge debenture over UKDIA's assets which mitigate the Group's exposure to Reinsurers' share of technical provisions.

Most notably, given that UKDE has a license to write insurance business, EU policies are written by UKDE. UKDE cedes 90% of risks below \$1 million and 100% of risks in excess of \$1 million to UKFDD.

In addition, and as further discussed in the risk management section, the Group has continued the practice of hedging its future premium income received in USD against fluctuations in the GBP / USD exchange rate. Counterparties on hedging contracts are reputable banking institutions as further disclosed in the risk management section.

Other than the above, there have been no material changes to the Group's underwriting risk mitigation programme during the current year.

# A. Business and Performance (continued)

#### A.3. Investment Performance

In accordance with the investment policy, the investment mandate is updated on a regular basis. The table below shows the Group's invested assets split by asset class as reported in the Group's UK GAAP financial statements:

Invested assets split by asset class as at 20 February 2023

|                                   | 2023    | 2022   |
|-----------------------------------|---------|--------|
|                                   | £000s   | £000s  |
| Asset class                       |         |        |
| Short term deposit funds          | 2,633   | 2,487  |
| Foreign exchange security deposit | 4,222   | 3,861  |
| Fixed income securities           | 1,233   | 1,450  |
| Cash and cash equivalents         | 2,022   | 4,107  |
| Derivative financial instruments  | (1,681) | 593    |
|                                   | 8,429   | 12,498 |

The following table details the Group's investment income by asset class as reported in the Group's UK GAAP financial statements:

Investment return split by asset class as at 20 February 2023:

|                          | 2023<br>£000s | 2022<br>£000s |
|--------------------------|---------------|---------------|
| Asset class              |               |               |
| Bank deposits            | 57            | -             |
| Fixed income securities  | 20            | -             |
| Short term deposit funds | 92            | 6             |
|                          | 169           | 6             |

Expenses related to the management of these investments were £0.04 million for the year (2022: £0.04 million).

As previously mentioned, the Group uses forward currency contracts to hedge the foreign exchange risks that it is exposed to as a result of future income being received in US Dollars. Future premium income is regarded as a highly probable forecast transaction and is designated as a hedged item. Forward currency contracts in relation to the hedged item are designated as a hedging instrument.

### A. Business and Performance (continued)

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges of a highly probable forecast transaction is recognised directly within equity as other comprehensive income in the UK GAAP financial statements. The gain or loss relating to any ineffective portion is recognised immediately in the consolidated income and expenditure account.

#### A.4. Performance from other Activities

The Group has no activities other than its main insurance activities as presented in A2 – Underwriting performance.

### A.5. Any other Information

Overall the Group produced an accounting loss of £0.28 million (2022: profit of £0.06 million) for the year resulting in an accumulated surplus of £4.53 million (2022: £4.81 million) in the UK GAAP financial statements. The UK GAAP financial statements additionally showed a negative cash flow hedging reserve of £1.12 million (2022: positive £0.42 million) which is the value attributed to derivatives designated as cash flow hedges. This resulted in total comprehensive loss for the year of £1.88 million (2022: loss £1.28 million).

#### Impact of the Russian invasion of Ukraine on the Group

On 24 February 2022, Russian troops started invading Ukraine. In response, multiple jurisdictions have imposed economic sanctions on Russia. This war has affected economic and global markets and continues to pose ongoing challenges to the global landscape. Whilst the Association does not have a physical presence in Russia or Ukraine, it has seen a rise in claims cost as a result of the conflict. This has mainly been driven by sanctions related risks and ships trapped in Ukrainian ports. The Association continues to keep the position under review and ensures compliance with sanction measures whilst acting for the benefit of its overall Membership.

# **B.** System of Governance

#### B.1. General Information on the System of Governance

#### The Board of Directors

Ultimate responsibility for the governance of The Group rests with the Board of Directors. The Group's Directors are generally drawn from senior individuals within the Membership. In practice the Board of Directors comprises individuals who are figures of standing within the shipping industry, are equity principals or main board directors of the organisations which they represent which in turn are Members of the Group. The Directors meet four times a year.

Governance, risk management and internal control and reporting procedures are consistent across all entities within the Group through use of consistent policy and procedural documentation.

The Board of Directors may delegate any of its powers, duties or discretions to committees consisting of such Directors as it sees fit. The Board of Directors is informed of the main issues discussed as all minutes of the meetings of the committees are distributed to the Board of Directors.

#### **Committees**

The following committees aid the Board of Directors in its duties:

#### Audit, Regulatory & Risk Committee

The Audit, Regulatory & Risk Committee ("AR&R") considers various issues relating to the sound and prudent management of the Group.

#### Management Fee Committee

The Management Fee Committee meets periodically and its main role is to negotiate with the Managers the management fee arrangements of the Group on behalf of the Board of Directors.

#### Strategy Committee

The Strategy Committee considers the Group's future strategy.

#### Nominations Committee

The Nominations Committee considers the composition of the Board and its Committees.

# **B.** System of Governance (continued)

#### **Key functions**

#### The Managers

The Group has no employees and as such the Board of Directors relies on the Managers for the day-to-day management duties of the Group. The Management function is performed by the Thomas Miller Group of Companies. The functions and responsibilities of the Managers are set out in the Management Agreement between the Managers and the Group.

The Board of Directors may delegate a wide range of powers, duties and discretions to the Managers on such terms as it sees fit. Under the Articles of Association the Managers are entitled to attend all meetings of the Board of Directors and of committees of the Board of Directors and all general meetings of the Group and have a representative on the Board of Directors.

#### The Investment Managers

Investment of the Group's funds is conducted by the Investment Managers in accordance with the Board of Directors' Investment Policy and is subject to internal compliance procedures.

The functions and responsibilities of the Investment Managers are set out in the Management Agreement between the Investment Managers and the Group.

#### **Governance Map**

The Group maintains a governance map that details the key Senior Manager Functions and Key Functions. The following functions are maintained through the governance map with a prescribed set of responsibilities:

- Chair (Board)
- Chief Executive Officer (Board / Managers)
- Chief Operations (Manager)
- Chief Financial Officer (Managers)
- Chief Risk Officer (Managers)
- Head of Internal Audit (Managers)
- Chair of Audit, Regulatory and Risk Committee (Board)
- Chair of Nominations Committee (Board)
- Chief Actuary (Managers)
- Chief Underwriting Officer (Managers)
- Claims Function (Managers)
- Investment Manager (Managers)
- Compliance Oversight (Managers)
- Money Laundering Officer (Managers)

# **B.** System of Governance (continued)

#### Remuneration

Directors receive an attendance fee for each meeting and an annual fee. Directors' fees are not subject to pension or early retirement schemes and there are no variable components to the Directors' remuneration.

The Group has no internal executive function and its management is wholly performed by companies within the Thomas Miller Holdings Ltd group of companies. The Managers are responsible for recruitment in line with the Thomas Miller Group Recruitment Policy and performance management, ensuring that all staff have and maintain the relevant skills, knowledge and expertise necessary to perform their roles and responsibilities.

#### **Related party transactions**

The Group has no share capital and is controlled by the Members who are also the insureds. The subsequent insurance transactions are consequently deemed to be between related parties, but these are the only transactions between the Group and the Members.

All, but one, of the Directors are current representatives of Member companies and other than the insurance, which is arranged on an arm's length basis, and Member interests of these companies, the Directors have no financial interests in the Group.

The Group reinsures with UKDIA on a 90% quota share basis. All Members of the Group are automatically also Members of UKDIA. However, none of the Directors of the Group are Directors of UKDIA. Additionally, UKDIA operates under a separate governance and operational structure, has its own rulebook, and is therefore not considered to be a related party of the Group.

Internally, UKDE cedes 90% of its risks to UKFDD who is also the parent company.

#### **B.2.** Fit and Proper Requirements

The Group has in place a Fit & Proper policy that sets out its approach to the fitness and propriety of the persons responsible for running the Group, including executive senior management and key function holders.

# **B.** System of Governance (continued)

They must be of good repute and demonstrate in their personal behaviour and business conduct character, integrity and honesty. As part of the assessment consideration will be given to potential conflicts of interest and financial

soundness. The level of fitness must be appropriate and proportionate to each person's role, tasks and responsibilities.

The Board of Directors must be composed in a way to ensure that its members collectively possess sufficient knowledge, competence and experience to direct and oversee the Group's affairs effectively.

### **B.2.** Fit and Proper Requirements

The Fit and Proper policy applies to:

- All Directors of the Group;
- All employees of the Managers who are members of the Thomas Miller's senior management; and
- Persons within the Managers responsible for key functions, being function holders for Risk Management, Regulatory Compliance, Actuarial and Internal Audit.

All persons within the scope of the policy are assessed against the requirements of the Senior Managers Certification Regime ("SMCR"). Fitness will include an assessment of the person's management and/or technical competencies required for the role based on qualifications, knowledge, experience and the demonstration of due skill, care, diligence and compliance with relevant standards (as applicable). Propriety will include an assessment of the person's reputation and past conduct.

Fit and proper assessments are carried out by the Chair, the Group Manager or the Compliance Officer. No person is permitted to undertake their own assessment.

# **B.** System of Governance (continued)

#### B.3. Risk Management System

#### Overview

The Group uses a Risk Management Framework to design an effective risk management system with an integrated approach to risk management and the application of the three lines of defence:

- 1st line of defence: business units, process and risk owners
- 2nd line of defence: risk management and compliance functions
- 3rd line of defence: internal and external audit

The risk management system includes:

- a clearly defined and well-documented risk management strategy;
- appropriate processes and procedures;
- appropriate reporting procedures;
- reports on the material risks faced by the Group and on the effectiveness of the risk management system;
- policies or frameworks; and
- a suitable Own Risk and Solvency Assessment ("ORSA") process.

The risk management system has a coherent focus on data and IT infrastructure governance and appropriate policies and standards to outline the framework within which responsibilities will be exercised. It is supported by a robust internal control system and is designed to manage significant risks to the achievement of the Group's business objectives. The core elements of the risk management framework are as follows:

#### Risk Management Strategy

The objectives of the risk management strategy are to identify, measure, monitor, manage, and report in a consistent, continuous and timely fashion, on the basis of the risk appetite as set by the Board of Directors.

Forecasts and long-term projections of how the business needs to develop and which internal and/or external factors might affect or impede such development are considered when carrying out business strategy reviews. Risk related to initiatives and objectives adopted in the business plan are added to the Business Risk Log.

#### Business Risk Log:

Risks to the business that could inhibit the Group achieving its business plan objectives are described in the Business Risk Log, together with the consequences should the risk materialise. The risks are categorised and assessed and monitored on an ongoing basis.

# **B.** System of Governance (continued)

Each risk in the Business Risk Log is assigned a Risk Owner and an accountable person. Risk Owners are required to report on their owned risks as part of a twice-yearly reporting process. Key themes are reported to the Audit, Regulatory & Risk Committee. The reporting process also includes potential emerging risks identified during the reporting period which are recorded in an Emerging Risk Log, and loss and near miss events.

A rating for each risk is determined by assessing its probability and impact. The assessment of each risk is on the basis of Inherent Risk and Residual Risk which is the risk that remains after taking into account the strength of current risk management procedures that are in place.

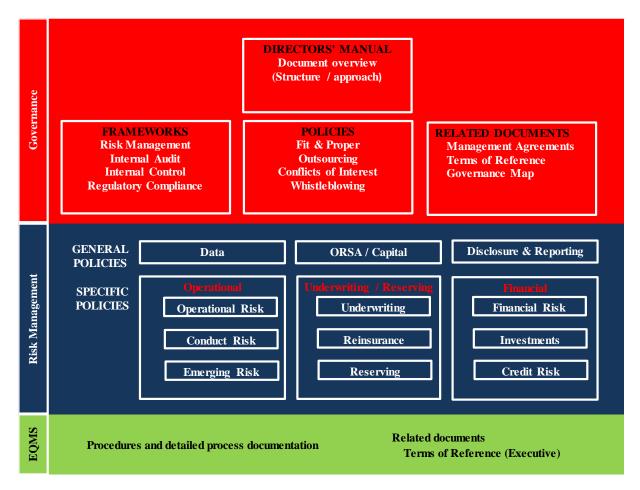

#### Risk Policies and Procedures

The Group's strategy is specified in more detail through its policies and business plan which underpin its day-to-day business. Policies define the Group's approach to risk management overall and more specifically the risk for which the policy has been written. The policies establish the controls, procedures, limits and escalation to ensure that the risks are managed in line with risk appetite. Specific procedures, where appropriate, have been developed to provide full understanding of the means by which the first and second lines of defence will implement the strategy.

The policies include appropriate reporting procedures to ensure that information relating to the component elements of the risk management is routinely reported to the Audit, Regulatory & Risk Committee and to the Board of Directors.

# **B.** System of Governance (continued)

The Group's governance and risk documentation includes the following:

#### Risk Appetite

The Group's Risk Appetite is articulated in the statement of risk appetite, which is a document owned by the Board of Directors and reviewed on a regular basis as new risks emerge, or at least annually. The Group's business strategy is aligned to the Corporate Plan and focuses on three critical areas:

- Strong independent financial position
- Sound underwriting and claim management
- Enhanced market share

The Board of Directors determines the appropriate risk appetite and sets the Group's risk strategy. It has developed high-level risk appetites that are used by the Board of Directors to monitor the implementation of the risk strategy.

# **B.** System of Governance (continued)

The Board of Directors bears ultimate responsibility for the management of risk and for maintaining a sound system of internal control that supports the achievement of the business strategy, policies, aims and objectives of the Group. The Audit, Regulatory & Risk Committee supports the Board of Directors by providing oversight of the Risk Management Function.

#### Key risks

A list of key risks has been compiled by the Group's Board of Directors and senior management of the Group based on their experience and expert judgement in running the business. This list provides a high-level overview of the principal risks faced by the business which, individually or in combination, may have a significant, substantial or catastrophic impact on the Group. The key risks affecting the Group are agreed by the Audit, Regulatory & Risk Committee each year.

#### Own Risk and Solvency Assessment ("ORSA")

Every year, and on an ad hoc basis, if circumstances materially change, the Group prepares an ORSA overview report. The ORSA is the process used by the Group to manage its financial and solvency position over the period of its Corporate Plan and the ORSA overview report is the culmination of this process into a report reviewed by the Board of Directors. As such, it is an intrinsic part of the Group's Corporate Planning Process.

The key elements of the ORSA process are:

- An analysis of recent performance
- Assessment of the risk profile
- Consideration of business planning and stress scenarios

The Audit, Regulatory and Risk Committee reviews the ORSA and recommends it for approval and use by the Board of Directors.

The Board of Directors reviews the ORSA and considers appropriate action for the Group such as:

- Capital related decisions
- General Increase considerations
- Reassessment of risk profile and risk appetite
- Additional risk mitigating actions

The Assessments to date indicate that the Group is adequately capitalised.

### **B.** System of Governance (continued)

#### Risk Controls

The Group's Risk Management Framework has been developed to manage risks across the business, using internal control policies, procedures and processes to control risks.

Whereas ultimate control for each risk rests with the Board of Directors, day-to-day control is exercised by the Risk Owners unless otherwise stated, as set out in the Business Risk Log. Further information on the Group's Internal Control Framework may be found in B.4 – Internal Control System.

#### Risk Reporting Procedures

Risk Owners identify operational risk loss or near miss events which are reviewed by the Managers' Management Board and then recorded on the operational risk database with remedial actions identified for which a completion date is set.

#### Implementation of the Risk Management system

The Risk Management Function is fulfilled by the Group's Risk Officer who oversees risk management; provides independent challenge; and has direct access to the Chair of the Audit, Regulatory & Risk Committee. The Risk Management Function maintains an organisation-wide and aggregated view of the risk profile of the Group, including monitoring risk tolerances against appetite, and advising on how risks might impact the business singly and in combination.

The integration of risk management processes with business activities is performed through the requirement for business function heads who are also risk owners on the Business Risk Log to focus on risk management on an ongoing basis whilst ensuring that the risks for which they are responsible remain within risk tolerance. This demonstrates the proactive application of risk management techniques to support the business processes and decision-making for which they are also responsible in their day-to-day insurance business activities.

#### **B.4.** Internal Control System

Internal control is defined as a continually operating process effected by the Group's Board of Directors, its Audit, Regulatory & Risk Committee, the Managers, all staff and systems and designed to support the Group in achieving its business plan objectives through efficient and effective operations and to protect its resources. Each Risk Owner, as named in the Business Risk Log, is responsible for the application of the Internal Control Framework and the design, development, implementation, documentation and maintenance of effective internal control processes in their area and reporting thereon.

# **B.** System of Governance (continued)

The Managers are responsible for establishing and maintaining an effective control environment throughout the organisation. In furtherance of that, there is a culture which values the highest levels of integrity in the staff, together with openness and honesty in relation to the conduct and reporting of all activities. Policies, procedures and processes are designed to define and support effective, efficient and appropriate activities at every level of the business.

#### Control activities

These activities are embedded into plans, policies, procedures, systems and business processes. Their effectiveness relies on the level of compliance by management and staff.

The nature of the controls implemented and the level of control exercised are based on the assessment of frequency and impact of the risk, risk appetite and the cost of implementing controls relative to the significance of the risk.

The Internal Control Framework as a whole and internal control processes individually are monitored on an ongoing basis through the following mechanisms:

- Performance indicators
- External data
- Analyses and reconciliations
- Regulatory compliance monitoring audits
- Internal audits
- Procedure monitoring audits

The Risk Function is authorised to: investigate and challenge any actions or concerns without influence from the business; be independent of operational business functions and without undue influence from the Board of Directors or other functions/management; have unfettered and direct access to all activities in its area of responsibility, including all documentation, systems, staff, Management, executive and non-executive Board members; and have direct access to the Chair of the Audit, Regulatory & Risk Committee.

The Risk Management Framework encompasses a number of elements that together facilitate an effective and efficient operation, enabling the Group to respond to a variety of risks.

#### Compliance function

The Group takes a risk-based approach to regulatory compliance, focusing on preventing breaches to regulatory principles and other rules and informing the relevant regulators of any that are material, or must be reported to regulators on a mandatory basis.

# **B.** System of Governance (continued)

In all cases of a regulatory breach, the Compliance Function investigates the cause and effect of breach and recommends remedies to the Managers' Management Board for approval.

The Board of Directors bears ultimate responsibility for Regulatory Compliance, and is supported by the Audit, Regulatory & Risk Committee.

The Compliance Function advises on and promotes compliance with applicable laws, regulatory requirements and administrative provisions and coordinates and monitors implementation of policies, processes and procedures to achieve compliance across the business, and manages regulatory compliance risk.

#### **B.5.** Internal Audit Function

The internal audit relationship is regulated by an Internal Audit Framework. Internal Audit is the "third line of defence" in the Group's internal control framework, established to provide independent assurance that the systems of internal control established by management ("first line") and the monitoring and oversight provided by the Risk Management and Compliance Functions ("second line") are fit for purpose and operating effectively.

The objectives of the Internal Audit Function are to provide independent assurance that business risks are identified and are being well managed and controlled by effective systems of internal control.

The Internal Audit function of the Group is provided by the Managers who employ an independent Head of Internal Audit ("HIA") who in turn reports to the Chair of the Audit, Regulatory and Risk Committee. The HIA may engage third parties to conduct some Audits under his/her management if it is felt that specific technical skills are required or where insufficient general audit resource is available.

#### **Independence**

The Internal Audit Function is independent from the organisational activities audited and free to exercise its assignments without impairment and on its own initiative in all areas. It is not authorised to carry out any operational work on behalf of any area of any business. The Head of Internal Audit reports directly to the Chair of the Audit, Regulatory and Risk Committee.

#### **Development of plans**

Audit Plans are developed by the Internal Audit Function on a rolling three year basis, subject to annual review and approval by the Audit, Regulatory and Risk Committee. The plan is designed to provide for all significant areas of the business to be audited during each three year period.

# **B.** System of Governance (continued)

#### **Planning**

The Internal Audit Function will prepare an Audit Planning Memorandum ("APM") for each audit, which describes the scope of the Audit and the key risks to be addressed. There will be a formal opening meeting at which the appointed audit team will meet relevant line management to discuss the planned audit and agree the scope of work.

The finalised APM will be sent to relevant line management and copied to appropriate business executives who have an interest in the outcome of the Audit.

#### Execution

The audit team is responsible for conducting the fieldwork including performing whatever control evaluation, substantive and compliance testing is deemed necessary. The Internal Auditor leading the assignment will discuss any findings as they arise with appropriate management to ensure that any misunderstandings or queries are dealt with as soon as possible.

An 'end of fieldwork' meeting will be held to confirm the factual accuracy of any control weaknesses identified during the course of the fieldwork and the recommended remedial action will be discussed at this meeting.

#### Reporting

A comprehensive Internal Audit report will be produced following completion of every Audit engagement. This report will include a description of any control deficiencies identified as well as the actions that have been agreed will be implemented to remedy these.

The report will include the names of the individuals responsible for remedial action and the date by which such actions will be completed.

All Internal Audit reports will be given an overall control rating which will be based on the severity of any individual control deficiencies identified.

The method of determining an overall control rating for Audit reports and for individual control weaknesses is described in the 'TMIA Framework' which is the methodology used by the Internal Audit function.

#### **B.6.** Actuarial Function

The Board of Directors are ultimately responsible for ensuring an effective Actuarial Function. This function is performed by the TM Actuarial Team, led by its Chief Actuary.

# **B.** System of Governance (continued)

The Actuarial Function is independent of the Group's management team and therefore able to undertake its duties in an objective, fair and independent manner. However, for operational purposes, the Actuarial Function is integrated into the Group's internal control system through its role on the Managers' committees and attendance at Board meetings.

The Actuarial Function undertakes all responsibilities as required by Solvency 2, including:

- coordinating and overseeing the calculation of technical provisions;
- ensuring the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions;
- informing the Board of Directors of the reliability and adequacy of the calculation of technical provisions;
- expressing an opinion on the overall underwriting policy;
- expressing an opinion on the adequacy of reinsurance arrangements; and
- contributing to the effective implementation of the risk management system including capital requirements and the ORSA process.

### **B.7.** Outsourcing

The Group has in place an outsourcing policy which is directed at services or activities which are particularly important or critical to the Group's business (material business activities).

Material business activities include the key functions of the Group's system of governance such as Risk Management, Compliance, Actuarial and Internal Audit as applicable, and all functions or activities that are fundamental to enable it to carry out its core business, including underwriting, claims handling and investments.

#### Management outsourcing

The Group has no internal executive function and its management is wholly outsourced to the Managers under a management agreement. In order to comply with its regulatory obligations, the Board of Directors has developed monitoring and reporting procedures and has delegated to the Audit, Regulatory and Risk Committee the monitoring of internal controls and risk. The risk control and reporting procedures to be followed by the Managers form part of their obligations under the Management Agreement. The Committee reports to the Board of Directors.

#### Investment management outsourcing

Management of the Group's investments is outsourced to Thomas Miller Investment Limited, part of the Thomas Miller group of companies, under an investment Management Agreement.

# **B.** System of Governance (continued)

The performance of the investment managers is monitored and supervised by the Board of Directors.

#### Internal audit outsourcing

The Group's internal audit function is outsourced to Thomas Miller Internal Audit. Internal Audit is supervised by the Audit, Regulatory and Risk Committee and the Board of Directors.

#### **Oversight**

The Board of Directors bears ultimate responsibility for outsourced functions, services, or activities and related governance. The Board of Directors is supported by the Audit, Regulatory and Risk Committee which reviews outsourcing arrangements and the Managers' Management Board which monitors the activities of the Group, including outsourcing.

#### B.8. Any Other Information

The Group considers no other information material to be disclosed.

#### C. Risk Profile

The Group has set out a number of risk appetite statements which guide the implementation of its business plan. Currently the Group is operating in line with its risk appetite.

The following sections consider each of the Group's risk categories. The key risks are Underwriting Risk and Market Risk.

### C.1. Underwriting Risk

The Group is a mono-line insurer, underwriting only legal expense insurance for ship owners or operators.

Underwriting risk is the risk that the Group's net insurance obligations (i.e. claims less premiums) are different to expectations. The Group considers the risk of existing obligations (Reserve Risk) separately to the risk of future obligations (Premium Risk).

Reserve risk is managed by the Group's reserving policy. The Group establishes provisions for unpaid claims, both reported and unreported, and related expenses to cover its expected ultimate liability. These provisions are established through the application of actuarial techniques and assumptions. In order to minimise the risk of understating these provisions the assumptions made and actuarial techniques employed are reviewed in detail by management.

Premium risk is managed by an underwriting policy which establishes rigorous underwriting practices in order to meet business needs and satisfy regulatory control. These are supplemented with a robust forecasting approach undertaken as part of the ORSA process.

Underwriting Risk is mitigated via the Group's reinsurance programme which covers claims in excess of \$1.0 million. Of the \$1.0 million per claim retained by the Group, 90% of the risk is covered by the Group's quota share reinsurer, UKDIA.

Underwriting Risk is most sensitive to an increase in expected claims costs. For example, a 5% increase in the Group's gross loss ratio will reduce the gross accounting surplus for the Group by £0.93 million on a gross basis and £0.09 million on a net basis. A 5% decrease to the loss ratio will have an equal, but opposite effect.

# C. Risk Profile (continued)

#### C.2. Market Risk

Market risk arises through fluctuations in interest rates, corporate bond spreads and foreign currency exchange rates (the Group does not hold equities). Such movements will affect not only the Group's investments, but also the value of other assets and liabilities such as premium income, claims payments and reinsurance recoveries.

The Group has an investment policy in place to manage exposure to its investments, and this is monitored by regular reports from the investment managers. Further discussion of this arrangement is provided below under the "prudent person principle".

Currency risk is a key risk for the Group as it primarily receives its premium income in US Dollars, but much of its outgoings are in Sterling or Euros. The Group uses forward contracts to mitigate this risk. In addition, the Group utilises an investment mandate that matches the currency of its assets and liabilities.

The following table details the Group's exposure to currency risk by each underlying currency as reported in the Group's annual Financial Statements:

| As at 20 February 2023                    | Sterling<br>£'000 | US Dollar<br>£'000 | <b>Euro</b><br>£'000 | Total<br>£'000 |
|---|-------------------|--------------------|----------------------|----------------|
| Short term deposit funds                  | 2,309             | 324                | -                    | 2,633          |
| Foreign exchange security deposit         | 4,222             | -                  | -                    | 4,222          |
| Fixed income securities                   | 1,233             | -                  | -                    | 1,233          |
| Net derivative financial instruments      | 26,401            | (28,082)           | -                    | (1,681)        |
| Reinsurers' share of technical provisions | 17,798            | 4,330              | 4,011                | 26,139         |
| Unearned reinsurance premium              | 278               | -                  | -                    | 278            |
| Debtors                                   | 100               | 1,331              | (310)                | 1,121          |
| Deferred acquisition costs                | 52                | -                  | -                    | 52             |
| Cash and cash equivalents                 | 1,268             | 744                | 10                   | 2,022          |
| Technical provisions                      | (19,707)          | (4,767)            | (4,438)              | (28,912)       |
| Unearned premium                          | (361)             | -                  | -                    | (361)          |
| Creditors                                 | (3,139)           | (103)              | (155)                | (3,397)        |
|   | 30,454            | (26,223)           | (882)                | 3,350          |

# C. Risk Profile (continued)

The prudent person principle

Under the Group's investment policy, all of the Group's investments are invested and managed in accordance with the 'prudent person principle', meaning that duties of the Investment Managers are discharged with the care, skill, prudence and diligence that a prudent person acting in a like capacity would use in the conduct of an enterprise of like character and aims. More specifically:

- to invest in assets and instruments whose risk can properly be identified, measured, monitored, managed, controlled and reported;
- to ensure the security, quality and liquidity of the portfolio as a whole;
- appropriate to the nature and duration of the Group's insurance liabilities;
- derivative instruments are possible if they contribute to a reduction of risks or efficient portfolio management;
- unlisted investments and assets are kept to prudent levels; and
- properly diversified to avoid excessive reliance on any asset, issuer or group, or geographical area.

The Group's funds are invested by the Investment Managers in accordance with parameters set by an Investment Mandate. The Investment Mandate provides a framework to the Investment Managers for the management and stewardship of the Group's investment assets in conformity with the business and investment objectives and sets the parameters within which the Group's basis and ad hoc as required and is subject to the Group's Investment Policy. The Investment Managers report to the Board of Directors at each meeting.

#### C.3. Credit Risk

Credit risk is the risk of loss in the value of the above financial assets due to counterparties failing to meet all or part of their obligations. The following table illustrates aggregate credit risk exposure for financial assets as reported in the Group's annual financial statements. The credit rating bands are provided by independent ratings agencies:

### C. Risk Profile (continued)

| As at 20 February 2023                    | AAA   | AA - A  | BBB   | Not rated<br>/ not<br>readily<br>available | Total   |
|---|-------|---------|-------|--|---------|
|   | £'000 | £'000   | £'000 | £'000                                      | £'000   |
| Short term deposit funds                  | 1,876 | 757     | _     | -  | 2,633   |
| Foreign exchange security deposit         | , -   | 4,222   | -     | -  | 4,222   |
| Fixed income securities                   |       | 1,233   | -     | -  | 1,233   |
| Derivative financial instruments          | -     | (1,681) | -     | -  | (1,681) |
| Reinsurers' share of technical provisions |       | 1,947 - | -     | 26,139                                     | 26,124  |
| Deferred acquisition costs                | -     | -       | -     | 52   | 52      |
| Debtors                                   | -     | -       | -     | 1,123                                      | 1,123   |
| Cash and cash equivalents                 | -     | 2,022   | -     | -  | 2,022   |
| Total assets subject to credit risk       | 1,876 | 6,553   | -     | 27,314                                     | 35,743  |

The Group's objective is to reduce credit risk through the risk management techniques discussed below.

The Group's exposure to unrated counterparties primarily relates to its 90% quota share arrangement with UKDIA. The Group benefits from debentures over UKDIA's assets, which mitigates the risk substantially. Exposure to other reinsurance counterparties is mitigated by the Group placing such reinsurances with counterparties rated A- or better.

Exposure to debtors is mainly in respect of calls and premium contributions. This is spread over a large number of Members and counterparties, which mitigates the risk. In addition, the Group carries out financial checks on existing and potential Members. Exposure to bank balances, however, is more concentrated, with two main counterparties and the risk is mitigated by placing funds surplus to normal operational requirements in money market funds and other investments.

### C.4. Liquidity Risk

Liquidity risk is the risk that the Group is unable to make payments as they become due. This is managed by the use of liquid investments and under the terms of the reinsurance agreement to call upon the Group's quota share reinsurer, UKDIA, in the event of a significant outflow of funds. The Group also has the benefit of a legal charge in the form of debentures over UKDIA's investments and other assets.

The following table provides a maturity analysis of the Group's financial assets representing the date that a contract will mature, amounts are due for payment or the asset could be realised without significant additional cost as reported in the Group's annual financial statements:

# C. Risk Profile (continued)

| As at 20 February 2023            | Within 1<br>year | 1 to 5<br>years | Over 5 years | Total    |
|-----------------------------------|------------------|-----------------|--------------|----------|
| Assets and liabilities            | £'000            | £'000           | £'000        | £'000    |
| Short term deposit funds          | 2,633            | -               | -            | 2,633    |
| Foreign exchange security deposit | 4,222            | -               | -            | 4,222    |
| Fixed income securities           | 1,233            | -               | -            | 1,233    |
| Derivative financial instruments  | (1,214)          | (467)           | -            | (1,681)  |
| Reinsurers' share of technical    | 6,932            | 14,773          | 4,434        | 26,139   |
| provisions                        |                  |                 |              |          |
| Deferred acquisition costs        | 52               | -               | -            | 52       |
| Debtors                           | 1,121            | -               | -            | 1,121    |
| Cash and cash equivalents         | 2,022            | -               | -            | 2,022    |
| Technical provisions              | (7,668)          | (16,340)        | (4,904)      | (28,912) |
| Net unearned premium              | (83)             | -               | -            | (83)     |
| Creditors                         | (3,396)          |                 |              | (3,396)  |
| Total                             | 5,856            | (2,034)         | (470)        | 3,350    |

The amount of gross expected profits included in future premium is as per the Solvency 2 balance sheet is £6.2 million. However, it should be noted that the Solvency 2 balance sheet does not reflect all future expense cash flows and the actual expected profit over the year would be lower than this.

### C.5. Operational Risk

Operational risk is defined as the risk of direct or indirect loss resulting from inadequate or failed internal processes, people and systems or from external events. In order to mitigate such risks the Group has engaged Thomas Miller as managers to document all key processes and controls in a document management system. This system is embedded into the organisation and available to all staff. Compliance with the procedures and controls documented within the system is audited on a regular basis through quality control checks and the internal audit function which is directed and reviewed by the Audit, Regulatory & Risk Committee.

#### C.6. Other Material Risks

There are no other material risks that the Group considers relevant for reporting.

### C. Risk Profile (continued)

### C.7. Stress and scenario testing

The Group carries out stress and scenario testing as part of its risk management and ORSA process. For management purposes stress and scenario testing are carried out including the results of UKDIA.

The base case business plan forecast for the next 3 years is used as the starting point for scenarios testing. The impacts of adverse scenarios are then evaluated. The following scenarios are included in the Group's latest ORSA and assessed against the Group's risk corridor:

- 1. Weaker than- and stronger than forecast GBP relative to USD
- 2. Below- and above forecast investment return
- 3. Adverse and favourable claims inflation
- 4. Impact of a cyber security breach.
- 5. Significant adverse claims development as a result of a large number consecutive insolvencies
- 6. Impact of climate change on sustainability of Membership
- 7. Major currency movements
- 8. War event
- 9. A scenario around the increase in complexity of sanctions regimes
- 10. Further downturn in UK economic markets.

Scenario's 1 to 3 highlighted that the Group would not move outside of its risk corridor in any of these scenarios. Scenario's 4 to 10 represents alternative scenarios, which are regarded as reverse stress tests. Whilst some of these scenarios caused the Group to break out of the bottom of its risk corridor, none of these scenarios caused the Group's capital resources to fall below its 1-in-200 capital requirement over the planning horizon.

### C.8. Any Other Information

The Group has not identified any other material information that is considered to be required to be disclosed.

# **D.** Valuation for Solvency Purposes

#### D.1. Assets

A basic principle of Solvency 2 is that assets and liabilities are valued on the basis of their economic value. This is the price which an independent party would pay or receive for acquiring the assets or liabilities. The value of the assets less the value of the liabilities is then taken as the starting point for determining the available own funds.

Materially all of the valuation differences between the Solvency 2 balance sheet and the current accounting balance sheet relate to the valuation of insurance liabilities ("technical provisions") which is further discussed in D.2 – Technical Provisions. The Group prepares its financial statements under UK GAAP and FRS 102 and 103.

Given that this is the first year that Solvency 2 figures are presented on a Group basis, no comparative figures are shown.

The Solvency 2 balance sheet is presented in S.02.01.02. A summary of assets is shown in the table below.

Valuation of the Group's assets as at 20 February 2023:

|   | 2023 *              |                  | 20                  | 22               |
|---|---------------------|------------------|---------------------|------------------|
|   | Solvency 2<br>£000s | UK GAAP<br>£000s | Solvency 2<br>£000s | UK GAAP<br>£000s |
| Deferred acquisition costs                | -                   | 49               | -                   | 30               |
| Investments                               | 6,776               | 6,776            | 6,489               | 6,489            |

| Any other assets not elsewhere shown      | 101                 | 101              | 39                  | 39               |
|   | 30,933              | 38,080           | 33,517              | 39,364           |

<sup>\*2023</sup> figures are unaudited.

The above table presents amounts at Solvency 2 and UK GAAP valuation bases respectively. For classification purposes the Solvency 2 classification of amounts has been used. Most notably, certain amounts recognised as investments under Solvency 2 would be recognised as cash and cash equivalents under UK GAAP.

The Group's assets are valued using the following principles:

# **D.** Valuation for Solvency Purposes (continued)

#### Investments

Investments are carried at market value. Market value is calculated using the bid price at the close of business on the balance sheet date. The market value of foreign currency investments is translated at the rate of exchange ruling at the balance sheet date.

Fair values of investments traded in active markets are measured at bid price. Where there is no active market, fair value is measured by reference to other factors such as independent valuation reports.

A financial instrument is regarded as quoted in an active market if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. If the above criteria are not met, the market is regarded as being inactive.

There are no material differences between the valuation used for Solvency purposes and the valuation used in the Group's financial statements.

#### Derivatives – forward currency contracts

Derivatives are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at their fair value. All derivatives are carried as assets when the fair value is positive and as liabilities when the fair value is negative.

The fair value of foreign exchange forward contracts is based on current forward exchange rates.

The Group currently has a number of forward currency contracts that relate to hedging the currency exposure on future premiums that are not recognised on the GAAP balance sheet. These are recognised on the Solvency 2 balance sheet.

There are no material differences between the valuation used for solvency purposes and the valuation used in the Group's financial statements.

#### Reinsurer's share of technical provisions

Reinsurer's share of technical provisions is treated consistently to gross technical provisions. Technical provisions is further discussed in D.2.

#### Deposits other than Cash equivalents

These amounts represent foreign exchange security deposits and are carried at market value in accordance with the valuation methodology of investments noted above.

There are no material differences between the valuation used for solvency purposes and the valuation used in the Group's financial statements.

# **D.** Valuation for Solvency Purposes (continued)

#### Receivables, trade not insurance

This balance includes sundry, short term receivable balances the value and settlement of which contains little to no uncertainty. Due to the short-term nature of these items, the carrying amount is considered to be a suitable proxy for its fair value.

There are no material differences between the valuation used for Solvency purposes and the valuation used in the Group's financial statements.

#### Insurance receivables

These represent balances that are due for existing insurance contracts. Due to the short term nature of these balances, the carrying amount is considered to be a suitable proxy for its fair value. These amounts are reviewed annually for impairment.

When these amounts are not yet due, they are included as a future cash flow in the calculation of technical provisions for Solvency 2 purposes as further detailed in D.2. This is materially different to statutory account requirements which require these balances to be presented separately on the face of the balance sheet whether they are due or not yet due.

#### Cash and cash equivalents

Cash and cash equivalents include cash at bank or in hand, deposits held at call with banks and other short term highly liquid investments. The carrying value of these balances is considered to be a suitable proxy for fair value.

There are no material differences between the valuation used for solvency purposes and the valuation used in the Group's financial statements.

#### Any other assets not elsewhere shown

These balances comprise sundry, short term receivables which are classified as sundry receivables in the statutory financial statements.

Due to the short term nature of these balances, their carrying amount is considered to be a reasonable approximation for fair value.

There are no material differences between the valuation used for Solvency purposes and the valuation used in the Group's financial statements.

# **D.** Valuation for Solvency Purposes (continued)

#### D.2. Technical Provisions

Net technical provisions as at 20 February 2023:

|                           | 2023 *<br>£000s | 2022<br>£000s |  |
|---------------------------|-----------------|---------------|--|
| Gross best estimate       | 16,221          | 19,324        |  |
| Risk margin               | 462             | 324           |  |
| Reinsurance best estimate | (19,734)        | (20,682)      |  |
| Net technical provisions  | (3,051)         | (1,034)       |  |
|                           |                 |               |  |

<sup>\*2023</sup> figures are unaudited.

The Group's technical provisions are valued using the following principles:

#### Bases, methods and main assumptions

The technical provisions are valued using the methodology prescribed by the Solvency 2 Directive and associated regulations. They consist of a "best estimate" of future cash flows (claims, premiums and expenses), which are discounted in line with risk-free interest rates to give the "present value" of those cash flows. Finally, a (market value) "risk margin" is added to take the total to a notional market value (i.e. equivalent to the amount that insurance and reinsurance undertakings would be expected to require in order to take over and meet the insurance and reinsurance obligations).

#### Claims

As the Group only covers legal expenses, all claims are analysed together in one risk group. Standard actuarial techniques are used to project these cash flows including chain ladder and Bornhuetter-Ferguson methods. The key assumptions related to the initial expected claims cost for each policy year and the projected notified claims development pattern. These methods are considered appropriate given the longevity and stability of the Group and its claims handling processes.

Allowance is made for claims on contracts bound, but for which coverage has not yet incepted (corresponding to the premium provision). These are valued using an inflation assumption applied to the previous year ultimate.

The future claims cash flows are the most uncertain element of the technical provisions. The uncertainty involved was further discussed in Section C1 on Underwriting Risk.

# **D.** Valuation for Solvency Purposes (continued)

#### **Premiums**

The premium cash flows in the technical provisions cover (i) the outstanding instalments of premium on expired business that are payable but not yet due on the valuation date (corresponding to the provision for claims outstanding); and (ii) the premium payable but not yet due on bound but not incepted business (corresponding to the premium provision).

#### Expenses

The Technical Provisions includes expense cash flows incurred in servicing insurance obligations. This includes both direct and overhead expenses, as well as investment management expenses. The provision is calculated directly in respect of the provision for claims outstanding (for expired business) and a corresponding amount is derived in respect of the premium provision (for bound but not incepted and unexpired business).

#### Risk margin

The risk margin is calculated based on the requirement to hold capital to meet the SCR until all claims liabilities are settled and a prescribed cost-of-capital rate of 6% per annum. This calculation is based on the assumption that a "reference undertaking" takes on the insurance obligations (and associated reinsurance arrangements). The SCR in this context is made up of Underwriting Risk, Counterparty Default Risk and Operational Risk only; assets are assumed to be invested in such a way that Market Risk will be zero and the referencing undertaking does not take on any new insurance obligations. The SCRs in future time periods have been assumed to be directly proportional to the best estimate claims liabilities net of reinsurance recoverables at those points in time.

#### Sources of uncertainty

The estimation of the ultimate liability arising from claims made under insurance contracts is the Group's most critical estimate. There are several sources of uncertainty that need to be considered in the estimate of the liability that the Group will ultimately pay for such claims. Estimates are made for the expected ultimate cost of claims, whether reported or unreported, at the end of the reporting period. The estimate of IBNR is generally subject to a greater degree of uncertainty than that for reported claims. In calculating the estimated liability, the Group uses a variety of estimation techniques based upon statistical analyses of historical experience which assumes past trends can be used to project future developments.

# **D.** Valuation for Solvency Purposes (continued)

In particular the following represents the main sources of uncertainty that may impact the outcome of the Group's technical provisions:

- Certain claims may turn out to be significantly longer, or shorter tailed than the whole book leading to an over- / underestimation of claims reserves. There is also a uncertainty around numbers and average cost of these claims.
- There is potential for IBNER to deteriorate to a greater extent than allowed for in the projections.
- New and unexpected claims types could impact the reserving methodology.
  This is partly allowed for in the Group's provision for Events not in Data
  ("ENID").
- Uncertainty surrounding the development and cash flow patterns may impact the outcome of the Group's technical provisions.
- Currency and exchange rates are inherently uncertain and may impact the outcome of the final technical provisions amount.

#### Differences between GAAP and Solvency 2 technical provisions

A reconciliation of UK GAAP technical provisions to Solvency 2 technical provisions is shown in the table below:

|  | note | Gross<br>£000s | RI<br>£000s | Net<br>£000s |
|--|------|----------------|-------------|--------------|
| UK GAAP technical provisions                       |      | 29,273         | 26,417      | 2,856        |
| Eliminate contingency margin                       | 1    | (5,013)        | (4,512)     | (501)        |
| Eliminate unearned premium                         | 1    | (354)          | (278)       | (76)         |
| Reallocation of amounts not yet due                | 2    | (416)          | (374)       | (42)         |
| Adjustment to expense management reserve           | 3    | 230            | 207         | 23           |
| Provision for contracts bound but not incepted     | 4    | (5,550)        | 224         | (5,774)      |
| Reinsurance counterparty default adjustment        | 5    | -              | (1)         | 1            |
| ENID adjustment                                    | 6    | 377            | 341         | 35           |
| Effects of discounting                             | 7    | (2,326)        | (2,290)     | (36)         |
| Solvency 2 technical provisions before risk margin |      | 16,221         | 19,734      | (3,513)      |
| Risk Margin  | 1    | 462            | _           | 462          |
| <b>Total Solvency 2 technical provisions</b>       |      | 16,683         | 19,734      | (3,051)      |

#### Notes

1. Contingency margin and Solvency 2 risk margin and unearned premium Since the Solvency 2 technical provisions figure is a best estimate, margins for prudence are removed under the Solvency 2 valuation methodology. The Solvency 2 risk margin is intended to represent a notional market value adjustment as discussed above.

#### The United Kingdom Freight Demurrage and Defence Association Limited

## **D.** Valuation for Solvency Purposes (continued)

In addition, any unearned premium is eliminated from the Solvency II balance sheet. All unexpired risks are included in the premium provision.

### 2. Reallocation of premiums not yet due

Under Solvency 2 valuation methodologies, all future cash flows are included in the calculation of technical provisions. More specifically, any amount not yet due shall be included as a future cash inflow under the calculation of Solvency 2 technical provisions. As a result, any amounts not yet due on the UK GAAP balance sheet is reallocated from receivable premium to technical provisions on the Solvency 2 balance sheet.

#### 3. Adjustment to expense management reserve

Unlike UK GAAP, Solvency 2 recognises all expense cash flows incurred in servicing insurance obligations. This includes both direct and overhead expenses, as well as investment management expenses. As such, an adjustment is necessary.

#### 4. Provision for contracts bound but not incepted

Solvency 2 valuation methodology requires contracts to be recognised when the insurer becomes party to the insurance contract. Usually, an undertaking becomes a party of the contract when the contract between undertaking and policyholder is legally formalised.

Nearly all of the Group's policies are coterminous with its financial year. The consequence is that nearly a full year's worth of business is recognised as Bound But Not Incepted ("BBNI") business. A provision on the Solvency 2 balance sheet, known as the "premium provision", is thus made for future premiums, claims and expenses that relate to BBNI business.

#### 5. Reinsurance counterparty default adjustment

For the Solvency 2 balance sheet, amounts recoverable from reinsurance counterparties must be adjusted for the expected losses due to counterparty default. This adjustment approximates the expected present value of the losses in the event of default, weighted by the probability of default for each counterparty. Under current accounting bases a provision for bad debts is only made where there is objective evidence that a counterparty may default on its obligation.

There is no expected reinsurance default in respect of the amounts recoverable from the Group's quota share reinsurer, UKDIA, due to debentures which the Group has over UKDIA's assets.

#### 6. Events not in data

Solvency 2 requires that all possible outcomes are allowed for when setting the technical provisions. Therefore, an additional provision needs to be made for "events not in data", i.e. potential adverse claims outcomes that have not been observed to date and hence are not taken into account in assessing the claims provisions.

### The United Kingdom Freight Demurrage and Defence Association Limited

## **D.** Valuation for Solvency Purposes (continued)

#### 7. Effects of discounting

Since Solvency 2 technical provisions take into account the time value of money, an adjustment is made for the discounting of all future cash flows, based on risk-free interest rates.

#### D.3. Other Liabilities

Valuation of the Group's liabilities as at 20 February 2023

|  | 2023 *              |                  | 20                  | 22               |

|  | Solvency 2<br>£000s | UK GAAP<br>£000s | Solvency 2<br>£000s | UK GAAP<br>£000s |
| Derivatives                                | 2,055               | 2,055            | 141                 | 141              |
| Technical provisions                       | 16,683              | 29,273           | 19,648              | 28,840           |
| Insurance & intermediaries payables        | 301                 | 301              | 387                 | 387              |
| Reinsurance payables                       | 2,371               | 2,746            | 4,079               | 4,417            |
| Payables, trade not insurance              | 361                 | 361              | 355                 | 355              |
| Any other liabilities, not elsewhere shown | 0                   | 0                | 0                   | 0                |
|  | 21,772              | 34,738           | 24,610              | 34,141           |

<sup>\*2023</sup> figures are unaudited.

The above table presents amounts at Solvency 2 and UK GAAP valuation bases respectively. For classification purposes the Solvency 2 classification of amounts has been used.

The Group's liabilities are valued using the following principles:

#### **Derivatives**

Further detail on the Group's valuation policy for derivatives may be found in D.1.

#### Technical provisions

Further detail on the Group's valuation policy for technical provisions may be found in D.2.

#### Reinsurance payables

These represent balances that are due to be paid for existing reinsurance contracts. When these amounts are not yet due to be paid, they are included as a future cash flow in the calculation of reinsurance technical provisions.

# The United Kingdom Freight Demurrage and Defence Association Limited

## **D.** Valuation for Solvency Purposes (continued)

Under statutory accounting requirements, these balances are presented separately on the face of the balance sheet whether they are due or not yet due.

#### Insurance & Intermediaries payables

These represent balances payable on insurance contracts. Due to the short term nature of these balances, its carrying amount is considered a suitable proxy for fair value. There is no difference between the valuation for Solvency purposes and the valuation used in the Group's financial statements

#### Payables, trade not insurance

These balances include sundry, short term payable balances the value and settlement of which contains little to no uncertainty. Due to the short-term nature of these items, the carrying amount is considered to be a suitable proxy for its fair value.

There are no material differences between the valuation used for Solvency purposes and the valuation used in the Group's financial statements.

#### Any other liabilities not elsewhere shown

These balances represent sundry short term payables the carrying amount of which is considered a suitable proxy for fair value. There are no material differences between the valuation used for solvency purposes and the valuation used in the Group's financial statements.

#### D.4. Alternative Methods of Valuation

The Group does not utilise any material alternative methods of valuation.

#### D.5. Any Other Information

The Group has not identified any other information that it considers material to be disclosed.

#### The United Kingdom Freight Demurrage and Defence Association Limited

## E. Capital Management

#### E.1 Own funds

All amounts are in thousands of pounds unless otherwise stated

|                                      | 2023 * | 2022   |
|--------------------------------------|--------|--------|
| SCR ratio                            | 255%   | 252%   |
| SCR                                  | 4,465  | 4,403  |
| Eligible own funds                   | 11,394 | 11,109 |
| Excess                               | 6,929  | 6,707  |
| Minimum Consolidated Group SCR ratio | 197%   | 211%   |
| Minimum Consolidated Group SCR       | 4,650  | 4,225  |
| Eligible own funds                   | 9,161  | 8,908  |
| Excess                               | 4,512  | 4,684  |
| Tier 1 basic own funds               | 9,161  | 8,908  |
| Tier 2 ancillary own funds           | 2,232  | 2,201  |

<sup>\*2023</sup> amounts are unaudited.

As a mutual insurer with no share capital the Group's capital structure consists of two types of own funds:

1. Accumulated income and expenditure account reserve and reconciliation reserve, which falls under Tier 1 and counts as Basic Own Funds ("BOF"). These funds may be fully utilised to meet both the Solvency Capital Requirement ("SCR") and the Minimum Capital Requirement ("MCR").

Tier 1 BOF are shown net of the Group's cash flow hedging reserve and contains no significant restrictions affecting the availability and transferability of these own funds.

2. The PRA has granted an approval for a method of calculation of ancillary own funds ("AOF") to UKFDD, by way of contingency calls. The method which results in AOFs of £2.4 million has been approved for a period of 4 years.

Under the Solvency 2 regulations, up to 50% of the SCR may be covered by these funds.

## E. Capital Management (continued)

#### Information, objectives, policies and processes for managing own funds

The Group's objective is that capital resources should exceed the Group's regulatory requirements. The Group forecasts its capital over a 3 year planning horizon.

# Material differences between equity as shown in the financial statements and the excess of assets over liabilities

The below table represents a reconciliation of UK GAAP reserves to Solvency 2 own funds.

|  | 2023    |
|--|---------|
|  | £000s   |
| UK GAAP reserves                                   | 3,352   |
| Solvency 2 gross technical provisions adjustment   | 12,590  |
| Net amounts reallocated from UK GAAP balance sheet |         |
| to technical provisions                            | (42)    |
| Solvency 2 Reinsurance technical provisions        |         |
| adjustment   | (6,683) |
| Elimination of deferred acquisition costs          | (56)    |
| Total Solvency 2 basic own funds                   | 9,161   |

The most material adjustment to reserves is as a result of the differences in valuation of technical provisions which has been further discussed in D.2.

# E.2 Solvency Capital Requirement and Minimum Capital Requirement

#### **SCR**

The below table summarises the capital requirements for the current period. Further details can be found in appendices S.25.01.g

|                               | £000s   | £000s   |
|-------------------------------|---------|---------|
| SCR                           | 4,465   | 4,403   |
| Made up of                    |         |         |
| Market risk                   | 2,250   | 2,864   |
| Underwriting & reserving risk | 2,419   | 1,605   |
| Counterparty default risk     | 415     | 441     |
| Operational risk              | 556     | 580     |
| Diversification benefit       | (1,175) | (1,088) |

<sup>\*2023</sup> amounts are unaudited.

# The United Kingdom Freight Demurrage and Defence Association Limited

## E. Capital Management (continued)

The SCR has been calculated using the Solvency 2 Standard Formula and is subject to supervisory assessment. The Group does not use any simplifications or undertaking specific parameters to calculate the SCR.

The main risks that drive the SCR are market risk and underwriting and reserving risk. Market risk arise mainly as a result of the Group's hedging programme on premium in future years where the hedge has been entered into, but no corresponding premium entry exist at present. Underwriting risk stems from the insurance risk that the Group assumes through the course of its normal business activities and is increased by lapse risk associated with future business. The Group SCR has increased by £62,000, mainly as a result of an increase in the underwriting and reserving risk module which is as a result of an increase in lapse risk. Lapse risk has increased due to an increase in premium bound but not incepted included in premium provisions.

The Group's Minimum Consolidated Group SCR of £4.6 million is an amount similar to the Group's SCR given that both the entities within the Group has calculated their MCR subject to the absolute floor for the MCR which amounts to £2.3 million for each entity. Absent the mandated absolute floor, the Minimum Consolidate Group SCR would be materially lower.

# E.3 Use of the duration-based equity risk sub-module in the calculation of the Solvency Capital Requirement

This sub-module is not used by the Group.

# E.4 Differences between the standard formula and any internal model used

The Group uses only the standard formula.

# E.5 Non-compliance with the Minimum Capital Requirement and non-compliance with the Solvency Capital Requirement

The Group has fully complied with the SCR and MCR requirement during the period under review.

#### E.6 Any other information

The Group has not identified any other information that it considers material to be disclosed.

### The United Kingdom Freight Demurrage and Defence Association Limited

## **Directors' Statement**

We acknowledge our responsibility for preparing the SFCR in all material respects in accordance with the PRA Rules and the Solvency 2 Regulations.

We are satisfied that:

- a) throughout the financial year in question, the Group and UKFDD has complied in all material respects with the requirements of the PRA Rules and the Solvency 2 Regulations as applicable to the insurer; and
- b) it is reasonable to believe that the Group and UKFDD has continued to comply subsequently and will continue to comply in future.

C.R. Kendall

For and on behalf of The United Kingdom Freight Demurrage and Defence Association Limited

22 June 2023

## Appendix – UKFDD Solo information

The Group has received a waiver from the PRA to present a single Group SFCR that incorporates the result of both the Group and UKFDD on a solo basis. The main part of this SFCR presents the Group results, unless otherwise stated. The results of UKFDD on a solo basis are detailed in this appendix.

<sup>\*2023</sup> amounts are unaudited.

The above table presents the amounts at Solvency II and FRS valuation bases respectively. For classification purposes, an aggregated Solvency II classification of amounts has been used in order to best demonstrate any valuation differences between the two bases.

Refer to UKFDD appendix S.02.01.02 for a full Solvency II balance sheet.

UKFDD's assets are valued in accordance with the Group's valuation principles further detailed in D.1.

In terms of UKFDD's investment in its subsidiary, UKDE, under FRS this investment is valued at cost less provision for any impairment, whereas on a Solvency II basis, the value of the investment is determined on a look-through valuation basis which considers the underlying Solvency II balance sheet of UKDE.

# **Appendix – UKFDD Solo information (continued)**

#### **UKFDD** Technical provisions

|                           | 2023 *<br>£000s | 2022<br>£000s |
|---------------------------|-----------------|---------------|
| Gross best estimate       | 16,432          | 19,627        |
| Risk margin               | 191             | 144           |
| Reinsurance best estimate | (19,734)        | (20,682)      |
| Net technical provisions  | (3,111)         | (911)         |

<sup>\*2023</sup> amounts are unaudited.

Refer to UKE QRTs S.17.01.02 and S.19.01.21 in the appendices for further details on technical provisions.

UKE's technical provisions are valued in accordance with the Group valuation principles further detailed in S.2.

#### Differences between FRS and Solvency II technical provisions

A reconciliation of FRS technical provisions to Solvency II technical provisions is provided below.

|   |       | Gross |         | Reinsurance | Net     |
|---|-------|-------|---------|-------------|---------|
|   | Notes | £000s |         | £000s       | £000s   |
| GAAP technical provisions                           |       |       | 29,063  | 26,417      | 2,646   |
| Eliminate contingency margin                        |       | 1     | (4,987) | (4,511)     | (476)   |
| Eliminate unearned premium                          |       | 2     | (354)   | (278)       | (76)    |
| Reallocation of amounts not yet due                 |       | 2     | (415)   | (374)       | (41)    |
| Adjustment to expense management reserve            |       | 3     | 230     | 207         | 23      |
| Provision for contracts bound but not incepted      |       | 4     | (5,162) | 222         | (5,384) |
| Reinsurance counterparty default adjustment         |       | 5     | 0       | (1)         | 1       |
| ENID adjustment                                     |       | 6     | 373     | 341         | 32      |
| Effects of discounting                              |       | 7     | (2,316) | (2,290)     | (26)    |
| Solvency II technical provisions before risk margin |       |       | 16,432  | 19,734      | (3,302) |
| Risk Margin   |       | 1     | 191     | 0           | 191     |
| Total Solvency II technical provisions              |       |       | 16,623  | 19,734      | (3,110) |

#### 1. Contingency margin and Solvency 2 risk margin

Since the Solvency 2 technical provisions figure is a best estimate, margins for prudence are removed under the Solvency 2 valuation methodology. The Solvency 2 risk margin is intended to represent a notional market value adjustment as discussed above.

# The United Kingdom Freight Demurrage and Defence Association Limited

## **Appendix – UKFDD Solo information (continued)**

#### 2. Reallocation of premiums not yet due

Under Solvency 2 valuation methodologies, all future cash flows are included in the calculation of technical provisions. More specifically, any amount not yet due shall be included as a future cash inflow under the calculation of Solvency 2 technical provisions. As a result, any amounts not yet due on the UK GAAP balance sheet is reallocated from receivable premium to technical provisions on the Solvency 2 balance sheet.

#### 3. Adjustment to expense management reserve

Unlike UK GAAP, Solvency 2 recognises all expense cash flows incurred in servicing insurance obligations. This includes both direct and overhead expenses, as well as investment management expenses. As such, an adjustment is necessary.

#### 4. Provision for contracts bound but not incepted

Solvency 2 valuation methodology requires contracts to be recognised when the insurer becomes party to the insurance contract. Usually, an undertaking becomes a party of the contract when the contract between undertaking and policyholder is legally formalised.

Nearly all of UKFDD's policies are coterminous with its financial year. The consequence is that nearly a full year's worth of business is recognised as Bound But Not Incepted ("BBNI") business. A provision on the Solvency 2 balance sheet, known as the "premium provision", is thus made for future premiums, claims and expenses that relate to BBNI business.

#### 5. Reinsurance counterparty default adjustment

For the Solvency 2 balance sheet, amounts recoverable from reinsurance counterparties must be adjusted for the expected losses due to counterparty default. This adjustment approximates the expected present value of the losses in the event of default, weighted by the probability of default for each counterparty. Under current accounting bases a provision for bad debts is only made where there is objective evidence that a counterparty may default on its obligation.

There is no expected reinsurance default in respect of the amounts recoverable from the Group's quota share reinsurer, UKDIA, due to debentures which UKFDD has over UKDIA's assets.

#### 6. Events not in data

Solvency 2 requires that all possible outcomes are allowed for when setting the technical provisions. Therefore, an additional provision needs to be made for "events not in data", i.e. potential adverse claims outcomes that have not been observed to date and hence are not taken into account in assessing the claims provisions.

### The United Kingdom Freight Demurrage and Defence Association Limited

# **Appendix – UKFDD Solo information (continued)**

#### 7. Effects of discounting

Since Solvency 2 technical provisions take into account the time value of money, an adjustment is made for the discounting of all future cash flows, based on risk-free interest rates.

#### **UKFDD Other liabilities**

<sup>\*2023</sup> amounts are unaudited.

The above table presents amounts using Solvency II and FRS valuation bases respectively. For classification purposes amounts have been aggregated using Solvency II classification methodologies.

UKFDD's other liabilities are valued in accordance with the Group's valuation principles further detailed in D.3.

#### **UKFDD Capital Management**

|                            | 2023 * | 2022   |
|----------------------------|--------|--------|
| SCR ratio                  | 241%   | 244%   |
| SCR                        | 4,737  | 4,555  |
| Eligible own funds         | 11,417 | 11,117 |
| Excess                     | 6,680  | 6,562  |
|                            |        |        |
| MCR ratio                  | 389%   | 419%   |
| MCR                        | 2,325  | 2,112  |
| Eligible own funds         | 9,048  | 8,840  |
| Excess                     | 6,723  | 6,728  |
|                            |        |        |
| Tier 1 basic own funds     | 9,048  | 8,840  |
| Tier 2 ancillary own funds | 2,369  | 2,277  |

# The United Kingdom Freight Demurrage and Defence Association Limited

# **Appendix – UKFDD Solo information (continued)**

UKFDD's principles for capital management are in accordance with the Group's capital management principles further detailed in section E.

The PRA has granted an approval for a method of calculation of ancillary own funds ("AOF") to UKFDD. The method results in eligible AOFs of £2.4 million.

# Material differences between equity shown in the financial statements and the excess of assets over liabilities

The table below provides a reconciliation of the capital reported within the financial statements to that within the Solvency II balance sheet.

|  | 2023    |
|--|---------|
|  | £000s   |
| UK GAAP reserves   | 3,277   |
| Solvency II gross technical provisions adjustment            | 12,439  |
| Of which amounts reallocated from UK GAAP balance sheet      | (41)    |
| Solvency II RI technical provisions adjustment               | (6,683) |
| Eliminate deferred acquisition costs                         | (54)    |
| Solvency II valuation adjustment of investment in subsidiary | 109     |
| Total Solvency II basic own funds                            | 9,048   |

The most material adjustment to reserves is as a result of the differences in valuation of technical provisions which has been further discussed above.

In addition, a Solvency II revaluation relating UKFDD's investment in its subsidiary is shown, which is further discussed in the section on valuation of investments above.

<sup>\* 2023</sup> amounts are unaudited.

# **Appendix – UKFDD Solo information (continued)**

#### **UKFDD Solvency Capital Requirement and Minimum Capital Requirement**

|                               | 2023 *<br>£000s | 2022<br>£000s |
|-------------------------------|-----------------|---------------|
| SCR                           | 4,737           | 4,555         |
| Made up of                    |                 |               |
| Market risk                   | 3,029           | 3,327         |
| Underwriting & reserving risk | 1,996           | 1,158         |
| Counterparty default risk     | 360             | 429           |
| Operational risk              | 545             | 589           |
| Diversification benefit       | (1,193)         | (948)         |
|                               |                 |               |
| MCR                           | 2,325           | 2,112         |
| MCR inputs                    |                 |               |
| Net written premium           | 11,090          | 9,679         |

UKFDD's SCR has increased by £182,000 when compared to the previous year. This is mainly due to an increase in underwriting and reserving risk given a larger lapse risk.

In terms of UKFDD's MCR, this has increased when compared to the prior year, given an increase in the absolute floor as mandated by EIOPA. Net written premium has seen an increase when compared to prior year which is mainly as a result of fluctuations in exchange rates.
